

SPARTAN MISSION

The mission of Spartan Consulting is to provide comprehensive consulting services in emergency & disaster planning, training, and exercises for the public and private sectors.

Our services encompass all aspects of the emergency management cycle including mitigation, preparedness, response, and recovery and we will focus on providing personal and specialized services to meet your specific needs in the following areas:

Exercise Design & Management

(Design, Facilitation, Evaluation)

Emergency Response Training Programs

(NIMS, ICS, HSEEP, HazMat/WMD)

Emergency Preparedness & Response Planning

(Drafting, Reviewing, Revising)

NIMS Compliance Assistance

(Assessment & Planning)

Special Projects

(Needs Based)

SPARTAN CONSULTING is a Montana-based emergency preparedness and management training and consulting firm owned and operated by Brett Lloyd, MEP, a recognized industry professional, and member of the International Association of Emergency Managers (IAEM).

Brett has over 18 years of relevant industry know-how gained through professional experiences in teaching, the military, and law enforcement. For the past five years, Brett has been involved with virtually all aspects of Emergency Planning & Management at the City, County, State, and Federal-levels having provided training, planning assistance, and disaster exercises to agency leaders, first responders, and first receivers throughout Montana, Idaho, and Wyoming.

Give Brett a call and let him tell you more about what Spartan Consulting can do for you!

SPARTAN CONSULTING, led by Brett Lloyd, MEP, offers consulting and training services based on nationally accredited standards in emergency preparedness & management for both private-sector and public organizations of all sizes. Our services encompass all aspects of the emergency management cycle and we focus on providing personal and specialized services to meet your specific needs.

Exercise Design & Management

Spartan's services in this category cover all facets of the exercise cycle including exercise design, management & facilitation, and evaluation. We offer complete exercise packages "from start-to-finish" or individualized services based on the needs of the client. The process begins with the client's need to test an element of their emergency plans or procedures and culminates in either a discussion-based or operations-based exercise that tests not only their plans and procedures, but also their decision-making processes, resource management skills, and communications capabilities. At the end of the exercise,

Realistic Exercise Scenarios

we provide a thorough After Action Report that outlines their strengths and weaknesses and our recommendations for improvement. In addition to being a FEMA Master Exercise Practitioner (MEP), Brett's experience in this field includes designing, facilitating, and evaluating literally dozens of exercises of all types (as defined under the

Homeland Security Exercise & Evaluation Program (HSEEP)) and serving as a Controller and Logistics Chief on *Last Chance I, 2004* and as a Controller for *Vigilant Guard 2009*, the two largest full-scale exercises ever held in Montana.

Emergency Response Training Programs

As a state and nationally certified instructor with over 18 years of experience, Brett is expertly qualified to provide training programs for a variety of subjects. Currently, Spartan Consulting offers over 20 different courses relating to emergency preparedness & management with more being added regularly. Our specialty is in delivering on-site training to groups of any size, and our courses range from short lectures to two-day, performance-based sessions.

Brett has over 18 years as an instructor.

Emergency Preparedness & Response Planning

Spartan offers complete planning services including plan drafting, reviewing, and/or revision. Brett has extensive experience in this discipline having drafted, reviewed, and provided input and assistance on dozens of emergency plans. In addition, Brett has served on numerous committees devoted to emergency preparedness and response; including the Lewis & Clark County *Local Emergency Planning Committee (LEPC)*, the State of Montana's *Anti-Terrorism Advisory Council (ATAC)*, The State Emergency Response Commission's (SERC) *HazMat Subcommittee*, and the *Montana Pharmaceutical Readiness Project Advisory Board*.

NIMS Compliance Assistance

The federal government has required that all state and local agencies and their private sector partners become compliant with the National Incident Management System (NIMS) in order to remain eligible for federal grant funding. Spartan Consulting offers full services to assist these entities with NIMS compliance assessments and the development of "NIMS Compliance Plans" to help them meet the necessary standards. Brett's experience in this arena includes assisting Lewis & Clark County Montana with compliance assessments, training, plans drafting and revision, equipment acquisition, exercises, and program development. Brett also assisted the State of Montana with NIMS compliance by serving as the leader of the *CBRNE Detection & Response Working Group* for the State's *Homeland Security Program and Capability Review*.

Tools & Products

Spartan has a variety of useful tools and products available for planning and response, including ICS/HICS forms, Job Action Sheets and visual aids, and EOC and Hospital Tool-kit DVDs. Most of the documents are available for free download from our website, or if you prefer, we offer a full range of printing and laminating options. Additionally, documents can be customized to meet client's wishes or simply to add that "personal touch".

Please see our website for more details and information on all of our products and services!
